

IN THE CLAIMS:

Please amend Claims 13-22 follows:

1. - 12. (Cancelled).

13. (Currently Amended) An image processing apparatus comprising:

a reproducing unit which reproduces a part of a moving image from a storage medium during a predetermined reproduction time; and

a determining unit which determines whether ~~or not~~ a first button is pressed before the predetermined reproduction time is passed,

wherein said reproducing unit reproduces not only the part of the moving image but also starts reproduction of the remaining part of the moving image, if said determining unit determines that the first button is pressed before the predetermined reproduction time is passed.

14. (Currently Amended) An image processing apparatus according to Claim 13, wherein said determining unit determines whether ~~or not~~ a second button is pressed during the reproduction of the remaining part of the moving image, and

said reproducing unit ~~finishes~~ terminates the reproduction of the remaining part of the moving image if said determining unit determines that the second button is pressed during the reproduction of the remaining part of the moving image.

15. (Currently Amended) An image processing apparatus according to Claim 13,
further comprising:

a display unit which displays the part of the moving image reproduced
from the storage medium,

wherein said display unit displays not only the part of the moving image
but also the remaining part of the moving image, if said determining unit determines that the first
button is pressed before the predetermined reproduction time is passed.

16. (Currently Amended) An image processing apparatus according Claim 13,
further comprising:

an output unit which outputs the part of the moving image reproduced
from the storage medium,

wherein said output unit outputs not only the part of the moving image but
also the remaining part of the moving image, if said determining unit determines that the first
button is pressed before the predetermined reproduction time is passed.

17. (Currently Amended) An image processing apparatus according to Claim 13,
wherein ~~[[said]]~~ the image processing apparatus includes ~~one of~~ a digital camera ~~[[and]]~~ or a
digital video camera.

18. (Currently Amended) A method for controlling an image processing apparatus,
[[said]] the method comprising the steps of:

reproducing a part of a moving image from a storage medium during a
predetermined reproduction time;

determining whether ~~or not~~ a first button is pressed before the
predetermined reproduction time is passed; and

reproducing not only the part of the moving image but also starting
reproduction of the remaining part of the moving image, if it is determined in said determining
step that the first button is pressed before the predetermined reproduction time is passed.

19. (Currently Amended) A method according to Claim [[13]] 18, further
comprising the steps of:

determining whether ~~or not~~ a second button is pressed during the
reproduction of the remaining part of the moving image; and

~~finishing~~ terminating the reproduction of the remaining part of the moving
image, if it is determined in said determining step that the second button is pressed during the
reproduction of the remaining part of the moving image.

20. (Currently Amended) A method according to Claim [[13]] 18, further
comprising the steps of:

displaying the part of the moving image reproduced from the storage
medium; and

displaying not only the part of the moving image but also the remaining part of the moving image, if it is determined in said determining step that the first button is pressed before the predetermined reproduction time is passed.

21. (Currently Amended) A method according Claim ~~[[13]]~~ 18, further comprising the steps of:

outputting the part of the moving image reproduced from the storage medium; and

outputting not only the part of the moving image but also the remaining part of the moving image, if it is determined in said determining step that the first button is pressed before the predetermined reproduction time is passed.

22. (Currently Amended) A method according to Claim 18, wherein the image processing apparatus includes ~~one of~~ a digital camera ~~[[and]]~~ or a digital video camera.
